

Paper Advent Wreath

Constructing The Wreath

Using a glue gun on the back of your leaf, glue the bottom along centre fold.

Press it on to your wreath base, at 12 O'Clock.

Give it some neighbours, using varying colours and shapes as preferred. This is your first row.

Working anti-clockwise, continue around, always covering the bottom of the previous row.

Varying the angles of the leaves will give a more natural look.

On the final row, tuck the leaves under the first row, giving a seamless look.

Take your pine sprigs and glue the bottom.

Tuck and secure them between the leaves at regular intervals.

Finish by firmly securing your bow.
